design make it easy to move
to multiple locations

Completely self contained
pumping system does not
need external connections.

Safety Feed connection
allows refilling of 1 gallon
F style jug with larger bulk
containers

The Two Step Entryway Footwear Sanitizing System

The Two Step allows the worker to sanitize the bottoms of their footwear quickly & easily. There's no need to install our system. It is completely self contained. Handy wheels make it simple to clean and reposition. No disassembly required for cleaning. Simply hose out and return to use location.
